DOTSB
Permanent Hydraulic Set Packer
DOTSB Permanent Hydraulic Set Packer

DOTSB Hydraulic Set, Permanent packer is designed for Single or Multiple zone completions in straight to highly deviated wells having high differential pressures.

The robust, high-performance packer can be set on tubing with anchor latch already inserted into the sealbore of packer, meaning single trip completion.

Ductile cast-iron full-strength, full-circle slips distribute the load evenly around the casing wall, maximizing the load rating and reliability.

Features

• 10,000 Psi., and 350°F rated standard packer.
• Recommended for High-pressure production or testing.
• Excellent packer for Fracture stimulations.
• Lower-zone isolation (packer as a bridge plug) using Knock-Out Sub.
• Tubing removal & insertion is possible as many times as required.
• Sets easily in P-110 Grade Casing to eliminate the need for carbide insert slips.
• The packer is available with materials and elastomers for hostile environments.
• Components keyed for easy milling.
• Anti-extrusion rings expand to casing ID to prevent rubber extrusion.
• Full circle slips allow for faster run time.

Note*: Elastomers available: Nitrile, HNBR, HSN, Viton, Aflas
**Threaded Latch Anchor Seal Assembly**

Threaded Latch Anchor is used to hold tubing in tension or compression. The Threaded Latch will automatically latch into the DOTSB Packer when weight is applied at the tool.

To release from the packer, pull 1,500 pounds of tension above tubing weight rotate 12 turns to the right at the tool.

Several sealing options are available from molded Nitrile seals to RTR, VTR, TKM, PEEK, RKTR enabling sealing to 10,000 Psi., and temperature ratings to 450 degrees F.

---

**Shear-type Anchor Latch**

Shear-type Anchor Latch is a Snap-In & Snap-Out Anchor Latch.

To release from the packer, pull the recommended tension above tubing weight to release from Sealbore Packer.

Several sealing options are available from molded Nitrile seals to RTR, VTR, TKM, PEEK, RKTR enabling sealing to 10,000 Psi., and temperature ratings to 450 degrees F.
